

List of posters

Session PS1

1. **E.N. Akimova.** Parallelization of algorithm for solving the inverse problem of gravimetry
2. **A.I. Alexandrovich, P.A. Kuvshinov, F. Popielas.** The application of a method of local functionals for account three-dimensional is intense - deformed condition of steel rectangular parallelepipeds with thin rubber interlayers
3. **A.I. Alexandrovich, A.A. Seregina.** The shapes and types of the definition of mechanical properties of a stochastic continuum in selfjoint operators of complex Hilbert spaces
4. **A.I. Alexandrovich, D.F. Titorenko, F. Popielas.** Use of methods of the multi-dimensional complex assaying for exploration of three-dimensional tasks of the theory of elasticity Cosserat
5. **O.N. Alikina, E.L. Tarunin.** Calculations of Ranque-Hilsch's effect
6. **O.A. Al-Arja, Yu.A. Lavrov, V.D. Lukyanov.** Influence of acoustid bridges on sound penetration through a double elastic partition in a rectangular waveguide
7. **A.P. Alpatov, A.E. Zakrzhevskii.** Deployment of an elastic tether in result of initial twist
8. **V.I. Astafiev.** Damage Accumulation and Hydrogen Embrittlement of Metals in Corrosion Media
9. **K.V. Avramov, Yu.V. Mikhlin, S.N. Savenkova.** Analysis of nonlinear normal modes in some problems of dynamics of nonlinear elastic systems
10. **A.O. Belyakov.** Determination of dynamic parameters of bulk bodies by vibration modes
11. **A.V. Bolesta, I.F. Golovnev, V.M. Fomin.** Uniaxial tension of Al/Ni composition study by molecular dynamics
12. **A.A. Bozhko, P.V. Bulychev, G.F. Putin.** Nonlinear wave regimes in ferrofluid convection
13. **A.A. Burenin, N.F. Lebedeva.** On constructing approximate solutions for problems in dynamics of incompressible elastic medium with axial symmetry
14. **A.E. Buzjurkin, S.P. Kiselev.** The oblique shock wave reflection from rigid wall in metal powders
15. **D.V. Bykin, P.A. Velmisov.** Analysis of dynamics of a mechanical system containing the cylinder with gas
16. **A.V. Cherepanov.** Mass transfer processes near pores of a gas saturated elastomeric material
17. **I. Curtu, A. Repanovici, L. Cristea, V. Ciofoaia.** Researches regarding the rigidity of gantry-type milling machine bodies
18. **I. Curtu, A. Repanovici, L. Cristea, V. Ciofoaia.** Representative mechanical tests for lignocellulose composites reinforced with glass, carbon and flax fibers
19. **O.I. Daneyko, T.A. Kovalevskaya, S.N. Kolupaeva, V.A. Starenchenko .** Mathematical modelling of a kinetic of strain hardening of dispersion-hardened alloys at different temperatures
20. **G. Deliu, S. Vlase, M. Deliu.** A new model of impact phenomena
21. **V.A. Demin, I.S. Fayzrakhmanova.** On thermovibrational convection in Hele-Shaw cell
22. **E.Y. Denisyuk.** Coupled diffusion and swelling processes in high elastic polymer networks
23. **V.A. Dibrov.** The stability of some nonlinear elastic systems, subjected to loads, randomly changing in time
24. **O.V. Doudko, A.A. Mantsybora.** The plane automodel problem about unloading of elastic-plastic half-space
25. **T.N. Dragunov, A.D. Morozov.** Invariant Sets of Dynamical Systems. Visualization and Analysis
26. **H. Dresig, X. Gao, P. Rodionow.** On analysis of vibrations of some self-locking mechanisms

27. **V.I. Erofeyev, O.A. Sheshenina.** Surface shear waves in homogeneous gradient-elastic half space with surface energy
28. **M.Yu. Filimonov.** The justification of Fourier method for describing nonlinear oscillatory motions
29. **V.M. Fomin, Zh.I. Kraus, I.I. Shabalin.** A state equation for solids and liquid metals in high pressure region
30. **A.B. Freidin, E.N. Vilchevskaja.** Phase transition zones for one class of nonlinear elastic materials
31. **O.C. Garishin.** Computer Simulation of Damage Accumulation and Structure Rearrangement in Highly Filled Elastomeric Composites
32. **S.N. Gavrilov.** On the choice of adequate model for description of stress patterns in cohesionless granular media
33. **A.A. Krasnov, P.E. Tovstik, T.P. Tovstik.** The centrifuge dynamics under action of the periodic or random pulses
34. **A.A. Seyranian, A.P. Seyranian.** The breakup of the resonance domains for Meissner's equation with insertion of small damping
35. **E.L. Tarunin.** Dynamic stability of the mathematical pendulum during complex vibrations of its hanging
36. **P.V. Tkachev.** Stability of particle triangle under compression
37. **V.A. Tsaplin.** Molecular dynamics simulation of surface diffusion for silicon crystals
38. **I.B. Volkovets.** Simulation of 3D spall processes
39. **A.I. Zaitsev, A.A. Kurkin.** Generation of anomalous edge waves above lineary inclined bottom at the presence of a random field of waves of open ocean
40. **I.Yu. Zoubko, I.E. Keller, P.V. Trusov.** Instability of deforming metal as a result of dislocation selforganization

Session PS2

1. **I.M. Gitman, H. Askes.** Determination of Representative Element Volume
2. **L.A. Golotina, L.L. Kozhevnikova.** A multi-level modeling of the mechanical behavior of particulate polymer composites
3. **A.V. Goncharenko, Yu.A. Chernyakov.** On the bifurcation of deforming process of viscoplastic solids
4. **A.A. Gousenkova.** Mathematical methods in some problems of elastodynamics for domains with a defect
5. **V.E. Grikurov, P. Neittaanmäki, B.A. Plamenevskii.** On spectra of surface waves in diffraction gratings
6. **V.A. Il'in, B.L. Smorodin.** Convection of dielectric liquid in alternating electric field of a horizontal capacitor
7. **O.S. Ipatyeva, A.S. Basin.** Investigation of pulse thermal effect on a material electrode
8. **A.A. Ivanova, A.F. Kuzaev.** Experimental investigation of dynamics of heavy sphere at rotary vibrations
9. **A. Janushevskis, J. Auzins, A. Boyko.** Comparative analysis of accuracy of software tools for calculation of mechanical system random vibrations
10. **A.A. Karabanov.** Degenerate resonances and chaos in four-dimensional double-frequency problem
11. **N. Karazeyeva.** Approximations of the equations of Non-Newton fluids motion
12. **M.I. Karyakin, T.V. Gavrilyachenko.** On the deformation of nonlinearly elastic cylinder with inner stresses
13. **O.N. Kirillov, A.P. Seyranian.** Metamorphoses of characteristic curves and optimization of nonconservative systems
14. **D.Yu. Kitaeva, Ya. I. Rudaev.** About localisation of tensile strains in conditions of superplasticity
15. **D.V. Komar.** Determination of free energy potential constants for elastomeric material
16. **V.V. Korepanov.** Application of numerical methods to the problem of mechanical characteristics identification of nonsymmetric elasticity theory
17. **E.L. Kouriatnikova.** The buckling behavior of helical compression springs in the different ranges of parameters
18. **A.S. Kozelkov, A.A. Kurkin.** Research of process of formation of anomalous high waves on a surface of ocean under non-optimal conditions at the presence of a random wave field on shallow water
19. **V.G. Kozlov, A.V. Chigrakov.** Mean dynamic of a fluid in rotating horizontal cylinder
20. **A.P. Krauklis, P.V. Krauklis.** Creeping wave near the cylindrical cavity
21. **V.I. Kuneev, V.V. Platonov.** To development of the concept of a sliding in mechanics of dynamic superplasticity
22. **A.G. Kyurkchan, Do Dyk Thang.** Effective method of solution of a wave diffraction problems on impedance scatterers near to a interface of two mediums
23. **M.S. Lastenko.** Instability of an elastic cylinder under tension
24. **D. Lobovikov, A. Hanov, B. Hramov.** Peculiarity of sliding of granular material on the surface of a rotating drum
25. **M. Lukyanov.** Stability of elastic and viscoelastic nonconservative systems under stochastic parametric excitation
26. **D. Lyubimov, T. Lyubimova, A. Mojtabi, A. Vorobyev, B. Zappoli.** Vibration influence on a near critical fluid filling a square cavity
27. **D.V. Lyubimov, T.P. Lyubimova, S.V. Shklyaev.** Parametric instability of semi-spherical drop
28. **D.V. Lyubimov, A.V. Perminov.** Acoustic influence on the convective boundary layer
29. **D.V. Lyubimov, A.V. Straube.** Linear stability problem of suspension in vibrational field

30. **A.A. Mailybaev, A.P. Seyranian.** Stability boundaries of periodic systems
31. **A.I. Malkin, T.A. Shumikhin.** Kinetic models of fracture and statistics of strength of solids
32. **L.I. Manevitch.** Complex representation in nonlinear dynamics and localized elastic waves
33. **A.E. Medvedev, A.Yu. Reshetnyak.** Heat release in the shock-wave front in liquid media with gas bubbles
34. **C.I. Mikhaylenko, V.V. Randin.** On CFD modelling of bubbly liquid downward flow
35. **A.A. Molgachev, P.A. Velmisov.** Numerical stability investigation of elastic elements of thin-shelled constructions under hydrodynamical action
36. **A.V. Porubov, D.V. Shevchenko.** Localized nonlinear strain waves in solids
37. **A.L. Svistkov, L.A. Komar.** Simulation of the elastic properties of elastomers taking into the orientational structural transformation of a polymer network under loading
38. **B. Tazioukov.** Nonlinear behaviour of bent plates at a dynamic loading
39. **T.P. Tovstik.** Dynamics of the Kelt stone
40. **S. Vlase, G. Deliu.** On the Finite Element Analysis of the elastic multibodies systems

Session PS3

1. **N.V. Chekhovskaya, Ya.I. Rudaev.** On analysis of strain rates field under superplasticity
2. **A.F. Chigaboutdinov.** The analysis of influence of sags on propagation of a longitudinal wave in a cylindrical shell
3. **G.D. Fedorovsky.** Mathematical models of fluidity and fracture approaches of thermoreologically complex media
4. **M.Yu. Gutkin, A.G. Sheinerman.** Misfit dislocations, disclinations and dislocation walls in two-phase cylindrical systems
5. **V.E. Khartsiev.** The effect of wavelike generation of rotation structures in solids under high velocity loading
6. **K.M. Ovsianikov, S.V. Sorokin.** Analysis of vibrations and energy flows in fluid loaded infinite elastic plates
7. **V.A. Palmov, Yu.M. Vetyukov.** The hierarchy of mathematical models for deep drilling of oilwells
8. **A.G. Pegushin, V.I. Erofeev.** Nonlinear effects of plane longitudinal wave propagation in porous materials
9. **Yu.V. Petrov, P.A. Glebovsky.** Dynamic fracture and the incubation time criterion in view of kinetic theory of fracture.
10. **E.N. Potetunko, D.S. Shubin.** The control of the viscous stream around the sphere
11. **A.K. Prykarpatsky.** Homology structure of ergodic measures
12. **M.A. Quintanilla, A. Castellanos, J.M. Valverde, F.A. Gilabert.** On the origin of the dispersion in the maximum angle of stability of a slope of cohesive granular material
13. **D.A. Rakov, Yu.A. Rossikhin, M.V. Shitikova.** Fractional calculus modelling of nonlinear free damped vibrations of suspension combined systems
14. **A. Repanovici, I. Curtu, V. Ciofoaia, L. Cristea.** Indirect stresses and strains in the protective helmets made of composites
15. **A. Repanovici, I. Curtu, V. Ciofoaia, L. Cristea.** Researches regarding the optimization of some parts of composite materials using genetic algorithms
16. **N.V. Selin, V.G. Kozlov.** Experimental study of pendulum thermovibrational convection
17. **A.K. Shalabanov.** The vibrations of elastic systems at given effects
18. **D.S. Shubin.** The control of the sphere resistance into viscous stream
19. **L.A. Slobozhanin, J. Iwan D. Alexander.** Universal diagrams of stability for disconnected capillary surfaces
20. **A.L. Svistkov, O.A. Putilova.** Symbolical viscoelastic and viscous-flow models of continuous media
21. **A.V. Utkin, I.F. Golovnev, V.M. Fomin.** Investigation of the detonation in 3-D solid crystal by the method of molecular dynamic
22. **N.A. Vaganova.** On certain properties of nonlinear ordinary differential equations systems for simulating wave motions
23. **O.N. Vasilyeva, V.V. Pikul.** The mathematical model of formation process of hemispherical shell made of glass-metal composite material
24. **A.S. Velichko.** Amplitude-energy characteristics of surface and internal gravity waves in ocean generated by underwater earthquakes
25. **S.V. Vlasenko.** Nonparametric optimization of airplane structures
26. **P. Voinovich, A. Merlen, E. Timofeev, K Takayama.** A Godunov-type finite-volume scheme for elastodynamics on arbitrary 2-D grids

27. **J. Vulfson, P. Dyatlova.** Influence of nonlinear position function of mechanisms on the changes of frequency characteristics
28. **I.N. Wasserman.** Numerical solution of some elastic dynamical problems with set-valued boundary conditions
29. **A.V. Zaitsev, A.V. Lukin, K.A. Noskova.** On principles of random structure computational generation of unidirectional fiber and particle reinforced composites
30. **A.N. Zakhlevnykh, A.N. Selivanov.** Reentrant transitions in cholesterics under competing shear flow and magnetic field
31. **P.V. Zinovyev, N.F. Lebedeva.** The construction of numerical solutions dynamic problems of shock deformation
32. **L.M. Zubov, A.A. Zelenina.** The General Theory of Nonlinear Pure Bending
33. **A.L. Zuyev.** Control and stabilization of a planar hybrid system
