

Contents

<i>Aleksandrovich A.I., Gorlova A.V.</i> Research of the equations of the flat theory of elasticity for physically nonlinear model	1
<i>Alexander R. Arutyunyan, Robert A. Arutyunyan</i> The frequency dependance of the fatigue fracture criterion	7
<i>Atroshenko S.A., Fedorovsky G.D., Krivosheev S.I., Petrov Y.V., Smirnov V.I., Utkin A.A.</i> The experimental investigation of rock fracture under pulse loading	9
<i>Iliya I. Blekhman, German E. Itkin</i> On energy and force barriers in transition between the stable states of objects	20
<i>Iliya I. Blekhman, Leonid A. Vaisberg</i> Adaptive properties of dynamic objects	25
<i>Artur Dabrowski</i> Energy Flow and Synchronization in the Energy Space	33
<i>Iliya I. Blekhman, Vladislav B. Vasilkov, Kira S. Yakimova</i> Hydraulic resistance of a cone-shaped channel in the conditions of vibration	46
<i>Victor Chaikin, Ekaterina Polyakova, Ivan Tarasenko</i> On the theory of constitutive equations for mediums with hereditary properties	52
<i>Mikhail A. Chmykhov, Nikolai A. Kudryashov</i> Approximate solutions of nonlinear heat equation for given flow	55
<i>V. I. Dovgan, D.A. Kitaeva, Ya.I. Rudaev</i> About structure formation self-organization at loading of quasibrittle materials	61
<i>Olga Yu. Efimova, Nikolai A. Kudryashov</i> Power expansions for travelling-wave solutions of the Burgers-Huxley equation	67
<i>M.L. Gandarias</i> Symmetry reductions of some lubrication equation	74
<i>F. A. Gilabert, A. M. Krivtsov, A. Castellanos</i> Computational design and mechanical characterization of microstructured solids in layers	90
<i>Yaroslav Kolpakov, Pavel Zhilin</i> A micro-polar theory for piezoelectric materials	103
<i>Tungyang Chen, Hsin-Yi Kuo</i> Exact correspondences between n -dimensional anisotropic and isotropic Green's functions in conductions	112
<i>J.Mennink, F. Soetens, N.A.Kutanova</i> Cross-sectional instability of aluminium extrusions with complex cross-sectional shapes	117
<i>Kyryll L. Muratikov, Alexei L. Glazov</i> Thermoelastic photoacoustic microscopy of solids with residual stresses	124
<i>Ekaterina Polyakova, Victor Chaikin, Oleg Zuev</i> On the problem of driving a soft shell along a surface of a rigid body enveloped by the shell	130
<i>S.H. Sargsyan, A.G. Farmanyanyan, M.N. Mutafyan, S.A. Vardanyan</i> Some Problems of Statics, Thermoelasticity and Dynamics of Micropolar Bars	135
<i>Aleksandra A. Komarova, Igor V. Shirko</i> The theory of limiting balance of the anisotropic loose environment	145
<i>Antonio Scalia, Mezhlum A. Sumbatyan</i> Harmonic Vibration of Rigid Punch on the Free Surface of a Porous Elastic Half-Plane	151
<i>Edoardo Scarpetta, Mezhlum A. Sumbatyan</i> One-mode wave propagation through a periodic array of interface cracks: explicit results	159
<i>Ekaterina V. Shishkina, Matthew P. Cartmell</i> Vibrational stabilisation of elastic plates	168
<i>M. B. Soloviev, A. I. Alexandrovich</i> Construction of analytical-numeric solutions of boundary problems of plane stationary flows of incompressible linear viscous fluid using analytical elements method	176
<i>Tatiana P. Tovstik</i> On the influence of friction on the Celt rattleback motion	183
<i>Iosif Vulfson</i>	

Subharmonic resonance arising due to the change of effective dissipative forces with action of polyharmonic excitation . . .	192
<i>Alexander A. Khromov, Anastasia A. Bukhanko, Sergey L. Stepanov</i>	
Deformations concentrators and fracture of plastic bodies	197
<i>Serge N. Gavrilov</i>	
On the acoustic excitation of a heteromodular bar	205
<i>Masashi Hirayama, Kinya Ogawa</i>	
Non-linear dynamic behaviors of the glider balloon; the newly developed ballooning	216
<i>Jeroen S. Hoving, Frans Molenkamp, Andrei Metrikine</i>	
The dynamic response of a discrete lattice containing dry-friction elements to a surface load	224
<i>V. A. Kuzkin</i>	
Analytical modelling of dust cloud fragmentation	233
<i>Alexander A. Le-Zakharov, B. Volkovets, Anton M. Krivtsov</i> Parallel implementation of burns-hut algorithm for simulation of planet system formation	237
<i>Olga S. Loboda</i>	
Comparison of discrete and continuum modeling for 2D nanocrystal stripe vibrations	243
<i>Andrei V. Metrikine</i>	
An efficient method for calculation of the dynamic response of periodically-inhomogeneous 3D structures to moving loads	250
<i>O. Shipilova, H. Haario, A. Smolianski</i>	
The particle transport method for convection-reaction problems	263
<i>M. Stangl, N.A. Beliaev, A.K. Belyaev, H. Irschik</i>	
Applying lagrange equations and Hamilton's principle to vibrations of fluid conveying pipes	269
<i>Michaël J.M.M. Steenbergen, Andrei V. Metrikine</i>	
The influence of the interface description in the analysis of dynamic beam - half-space interaction	276
<i>Przemysław Szumiński, Tomasz Kapitaniak, Jerzy Wojewoda</i>	
Determination of inertia tensors of manipulators on the basis of local matrices of homogeneous transformations	285
<i>Pavel V. Tkachev</i>	
Stability loss criterions of the material with microstructure	300
<i>Hidekazu TSUJI, Masayuki OIKAWA</i>	
Oblique interaction of solitary waves in an extended Kadomtsev-Petviashvili equation	303
<i>Alexander B. Freidin, Elena N. Vilchevskaya</i>	
On initial stage of stress-induced phase transformation due to multiple appearances of new phase ellipsoidal nuclei	311
<i>V.G. Kozlov, D.A. Polezhaev</i>	
Vibrational dynamics of viscous liquid in a rotating cylinder	318
<i>N.V. Banichuk, S.Yu. Ivanova, E.V. Makeev, A.V.Sinitsin</i>	
Non-local shell optimization with application of genetic algorithm	325
<i>Tomilin A. K.</i>	
Electromagnetic way of vibrodiagnostics of composite beams' internal condition	335
<i>Bayzakova G.A., Tomilin A.K.</i>	
Electromagnetic control of acerbity of springy element	337
<i>Anton M. Krivtsov</i>	
MD modeling of low-cycle high-amplitude loading of monocrystal material with defects	341
<i>M.P. Cartmell, M.C. D'Arrigo</i>	
Simultaneous forced and parametric excitation of a space tether	347
<i>Kristina I. Kurennaya</i>	
Nonlinear interaction of normal elastic waves in solids	356
<i>Michail A. Kulesh, Matthias Holschneider, Mamadou S. Diallo, Kristina I. Kurennaya</i>	
Elliptic properties of elastic surface waves in wavelet domain	361
<i>Vadim F. Koshelev, Alexander M. Linkov</i>	
On numerical implementation of non-local fracture criterion to inhomogeneous media	367
<i>D.P. Kouzov</i>	
Gravitational correction to acoustics equations	373
<i>Daniil P. Kouzov</i>	
Influence of medium compressibility on distribution of gravitational waves on the fluid surface	383
